CodeHS is committed to providing an unbiased and inclusive learning environment through our computer science curriculum. We believe in fostering diversity, equity, and inclusion, and we strive to ensure that all our educational content is free from bias, offering every student an equal opportunity to learn and thrive.

Our curriculum is designed with neutrality, promoting a fair and balanced approach to learning. We recognize the potential for both conscious and unconscious bias, and we actively take steps to mitigate them in our materials. Regular reviews and revisions of our content are conducted to ensure its objectivity, facilitating an inclusive learning experience for all students.
