

After the Hour of Code

Congrats on running an Hour of Code where students started learning the basics of programming! Learn how you can keep this excitement and momentum going with CodeHS.

Why Teach Computer Science?

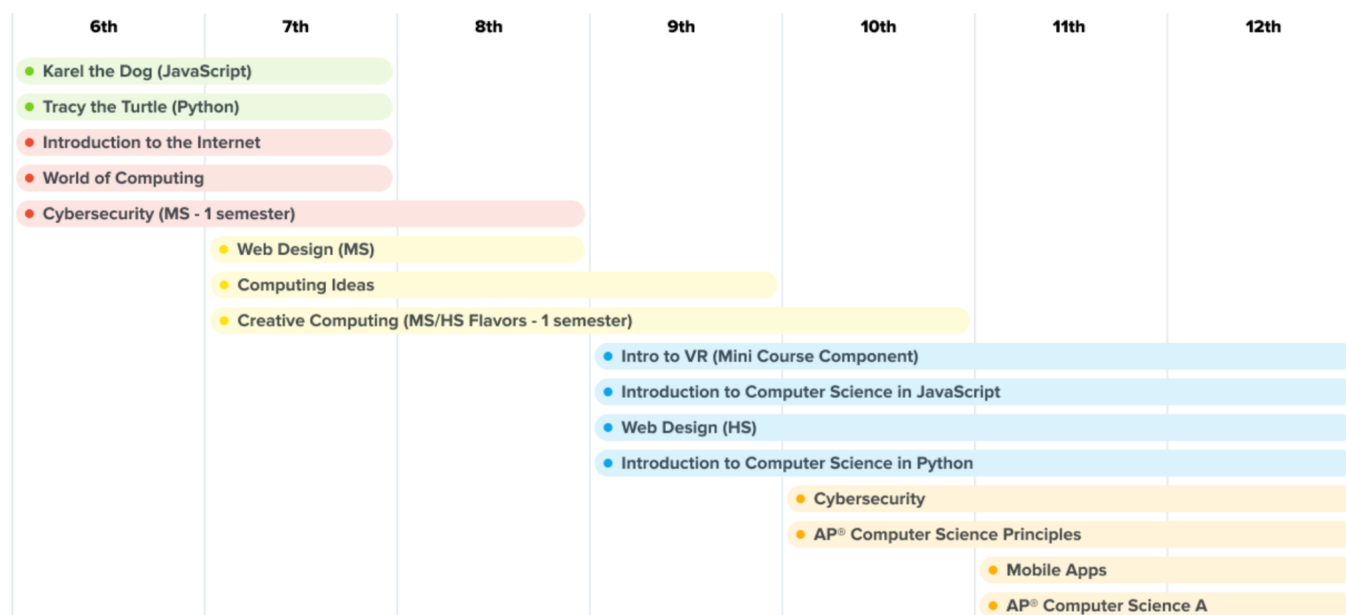

In today's digital world, coding is a foundational skill, just like reading and writing. Computer science is now used across every industry and provides limitless creative opportunities for students.

Next Steps

Contact the CodeHS Team at hello@codehs.com to discuss expanding your school's computer science course offerings across K-12. CodeHS has everything you need all in one spot with customizable professional development, teacher tools, resources, an online IDE, and much more.

Roll out a Comprehensive K-12 Computer Science Pathway

From introductory block based coding to College Board Approved AP curriculum, CodeHS offers a full K-12 computer science pathway. All courses are customizable and align to state and national computer science standards.

Get Started

With CodeHS, you can seamlessly implement a computer science program and enjoy dedicated support all along the way. Contact us today at codehs.com/learnmore.
